

Alpine Village Living Quarters

\$6,200,000 | May 2009

The Alpine Village project entails the construction of four buildings, each with 21 units over subterranean parking garages, a common club house area, site utility infrastructure and site civil work – including paving, concrete, landscaping, retaining walls, lighting, and irrigation. Phase I, which included one of the four planned buildings consisting of 21 units totaling 32,596 sqft in size has been constructed. Site infrastructure designed to accommodate all 4 buildings (80 units) has also been constructed. Subsequent phases for the remaining three buildings are on hold until funding has been cleared.

Project Features:

- New Construction
- Multi-story Building
- Subterranean Parking Garage
- High End Finishes
- Heated Concrete Drive
- Controlled Access
- Retaining Walls
- Landscaping
- Irrigation
- Paving
- Utilities
