

Anniston Army Depot Job Order Contract (JOC), Anniston, AL

\$75 Million

NASCO began construction on a \$75M contract at Anniston Army Depot, Alabama, in May 2008. The scope of work has included building highly specialized facilities in support of the depot's chemical weapons and tracked vehicles missions.

Our Anniston team is comprised of an outstanding team of qualified professionals. We have an onsite Project Manager, Quality Control Manager, Superintendent, and Project Business Administrator. NASCO has prequalified 58 local subcontractors to ensure this mission-critical work is completed on-time and within budget.

The **Federal Government** has rated our work as **“Outstanding”** on their official CCASS reporting system.

Anniston Army Depot is a major United States Army facility fulfilling various depot operations. Primary missions are the repair of tracked vehicles and storage of chemical weapons.

Project Features:

- Work on a highly secure, mission-critical Army depot
- Constructing specialized facilities to support tracked vehicles such as the Abrams and Patton tanks
- Constructing specialized facilities to house chemical weapons, bombs, rockets, etc.
- \$75M contract
- No lost work due to accidents or incidents
- LEED certified construction
