

Bureau of Indian Affairs New Mexico and Arizona MACC

\$125 Million

This large contract is for the Bureau of Indian Affairs (BIA) and encompasses work in Arizona and New Mexico. To date, NASCO has completed **nearly 1,000,000 sf of projects** for the BIA, ranging from schools to office buildings to public centers.

This contract has posed several challenges that would discourage and perhaps even disrupt most companies. Due to the remote nature of the projects, and working on a culturally and politically sensitive reservation, work has not always been easy. NASCO met these challenges by hiring local workforce whenever feasible, and prequalifying subcontractors accustomed to the work environments. We also established relationships with reliable vendors throughout the region. **NASCO's owners have also traveled to New Mexico and Arizona numerous times to meet with the clients and work with the project teams when difficult circumstances arose. Some of these trips resulted in the owners staying longer than 6 weeks at a time!**

Despite these challenges, NASCO has been able to complete all projects on-time, within budget, and to the satisfaction of our clients. NASCO is a company known for adapting to the needs of our clients.
