

Department of Homeland Security IDIQ Contract

Federal Law Enforcement Training Center, Glynco, GA

\$6 Million

NASCO's performance on task orders for the contract earned us an **outstanding** overall rating on the government's final performance evaluation.

The Federal Law Enforcement Training Center (FLETC) IDIQ Construction Services effort was a \$6M/3-year, IDIQ, coefficient-based construction services contract performed on a US Federal installation with sensitive mission operations.

The contract, which was recently completed, entailed construction, alteration, and repair of government owned facilities at the FLETC in Glynco, Georgia. 60 task orders were issued to NASCO during the life of this contract ranging from \$3,000 to \$1M. **Due to increased government task orders, the contract amount was increased from \$6M to \$9M.**

FLETC awarded NASCO with the 2007 Department of Homeland Security Small Business Achievement Award because, as stated in the award letter from FLETC, *"NASCO's pro-active attitude, responsiveness, and willingness to go the extra mile are characteristics the FLETC looks for in its contractors."*

Intermodal Site

The Intermodal site is composed of a multipurpose transportation terminal building to support student training for response to emergencies on aircraft, passenger trains, subways, freight rail, train yard, city buses, and parking garages.

Keifer Circle Site

The Keifer Circle site is composed of many urban type settings such as motel, foreign markets, housing, and traffic circles for training. The facility also features a fully-functional mock port-of-entry.
